Senate Committee On Judiciary

Measure, Appointment or Topic:

SJR203

Please support this joint resolution. Masking and not being able to identify law enforcement is militaristic and threatening to anyone. People must be able to see who is enforcing the law and must have some idea of the name and organization that may be pulling the person over in a car or coming in or near a home or apartment. Eye contact is not enough to alleviate fear and distress for those who may be at risk. I would personally be extremely uncomfortable if I was approached by one or more masked and unidentifiable people and more so with camo gear and flak jackets. Work together and get voter support as soon as possible. Do not delay until the November elections if at all possible.
