

Submitter: Raymond Krulic  
On Behalf Of:  
Committee: Senate Committee On Health Care  
Measure, Appointment or Topic: SB1598

SB1598 would grant broad power to unelected public health officials to make decisions that affect each and every one of us. This would be unchecked authority without public debate.

It would grant automatic mandates that clear the way for vaccine requirements that affect our children's access to schools.

It would invoke statewide one-size-fits-all medical orders without individual consent which is very dangerous as each individual is different and reacts differently to medical interventions.

I oppose overriding my doctor's ability to make medical decisions that are in my interest and specific to my health, based on my own choices.

I strongly support medical freedom, individual choice, and parental rights concerning the medical interventions which impact their children and themselves. SB1598 shifts medical decision making away from individuals, parents, and doctors to unelected bureaucrats.
