Committee:

House Committee On Agriculture, Land Use, Natural
Resources, and Water

Measure, Appointment or
Topic: HB4105

My husband and I are both over 80, we have visited and hiked in our national forest lands for most of our adult lives. This bill will threaten the future health of our state AND this planet by decreasing our ability to slow climate change, and increasing the likelihood of more wildfires and polluted water. We have more than enough scientific evidence that undisturbed ecosystems contribute to a sustainably healthy environment. Please do the right thing for the future!
