

Submitter: Kelley Nielsen

On Behalf Of:

Committee: Senate Committee On Health Care

Measure, Appointment or Topic: SB1598

Herd immunity, which comes from vaccines not mass infection, is a true collective project. With global warming driving an increase in the risk of novel diseases, health leaders need the power to act. This measure opens the door for responsible citizens to obtain vaccines, and forces them on no one. Don't let cost or politics get in the way of public health.
