

Submitter: Annette Harings
On Behalf Of: Family
Committee: House Committee On Economic Development, Small
Business, and Trade
Measure, Appointment or Topic: HB4086

My family and I are highly opposed to this cash grab to billionaires at the expense of children, the environment and regular people. There will be little to no jobs created, with a horrific blight of environmental devastation to a needed agricultural land—during drought and climate change.

This is literally the opposite of what politicians should be doing now. Anyone who votes for this has been bought and paid for by big business, and has an absolute disdain regular people and common sense.
