Committee:

House Committee On Judiciary

Measure, Appointment or Topic:

HB4106

I can't think of something we need less than more immunity for law enforcement at a time when our vulnerable communities are being attacked by all kinds of law enforcement. As a disabled mother of a disabled young man, the very last group of people whose autonomy should be taken away is disabled people, they need more advocates and avenues to self determination than other groups. Please don't contribute to the already rampant ableism. We must end immunity not give more of it. Everyone should be held accountable for their actions and taking away rights is a slippery slope. Remember, whatever you let your government do to one group, they will eventually do to you. Anyone with basic empathy must vote no.

Thank you,

Sarah Cornwell
