

Submitter: Suzanne Mendez
On Behalf Of:
Committee: Senate Committee On Early Childhood and Behavioral Health
Measure, Appointment or SB1548
Topic:

As a pediatrician, I've seen many kids get into their family members' edible THC products. These products look and taste like candy ---and have high amounts of THC versus the size of a child. Fortunately, the patients I have seen have all recovered, but one child was so sedated that he almost needed a ventilator to breathe, and most of the children required hospitalization. Please help prevent accidental poisonings in children and vote for this bill.
