

Submitter: Colleen Murray

On Behalf Of:

Committee: House Committee On Agriculture, Land Use, Natural
Resources, and Water

Measure, Appointment or Topic: HB4105

At this point, we know WAY too much about climate change and what's to come to make unscientific decisions like this and support more clearcutting and the destruction of old growth forests. We should be vigilant in protecting contiguous forest land, biodiversity, and the systems that preserve and clean our water. We need to make decisions now that we will look back on and say "thank goodness" we did. It's not hyperbole to say that wars will be fought over water and Oregon needs to fight now to protect and preserve our resources, tourist attractions, and natural habitat.

I'm an Oregon native and an avid outdoorsperson as most of us are. I urge you to oppose this bill. Instead, this committee should focus on measures that would protect Oregon. Economies MUST change and adapt to our changing world. Please oppose this bill and ensure it does not pass out of committee.

Sincerely,
Colleen
