Loretta Johnson

On Behalf Of:

Committee:

Joint Committee On Ways and Means Subcommittee On  
Capital Construction

Measure, Appointment or SB5701

Topic:

The city will not allow me to build on my property because there is no sewer line to connect into on the northwest end of town. Once the sewer line is available, we are in a position to construct much needed housing. The number of houses we can build is not enough on it's own to absorb the cost of the sewer line needed because of the long distance it has to come from. The city is in dire need of additional housing and seems eager to approve new homes once the sewer line is constructed.
