

Submitter: Nancy Hiser
On Behalf Of:
Committee: House Committee On Emergency Management and Veterans
Measure, Appointment or HB4100
Topic:

We live with huge risks from the CEI Hub on a daily basis. The seismic clock is ticking and it is anyone's guess how many people will die or be injured, how much the environment and wildlife will be damaged, how the state will function for a time / recover with no fuel, what the humongous economic price tag will be when an earthquake strikes, or a flood, a fire, an accident, a human error triggers the largest disaster in US history.

Risk bonding has the opportunity to incentivize those facilities that bring risk to the public to make their operations safer and to avoid an unimaginable financial catastrophe to the state and surviving taxpayers.

We must do everything we can to minimize the fallout.

I strongly urge support of this measure.

Thank You, Nancy Hiser, Linnton, Portland
