

Submitter: Gretchen Stolfo

On Behalf Of:

Committee: House Committee On Agriculture, Land Use, Natural Resources, and Water

Measure, Appointment or Topic: HB4105

Dear Co-Chairs Helm and Owens, Vice Chair McDonald and Members of the Committee,

I oppose House Bill 4105. This timber industry bill prioritizes logging over all other forest values on state forests. It undermines the state forest Habitat Conservation Plan and would lead to more clearcuts, more industry lawsuits, less habitat for fish and wildlife and less carbon storage on state public forests.

The bill is unnecessary. The Department of Forestry already has processes in place to establish timber harvest goals and regularly meets or exceeds those goals, often at the expense of water quality, imperiled species and carbon storage.

The bill is expensive. It would require costly rule making and lead to non-stop litigation the state would have to defend against at taxpayer expense. The bill creates a new special right for the timber industry to sue the Department of Forestry to force more logging on state forests. The state can't afford unneeded legislation with an enormous fiscal impact.

I urge you to oppose this bill. Instead, I encourage this committee to focus on measures that would increase carbon storage on our state forests and safeguard public state forests and waterways for current and future generations.

We are currently at a tipping point in carbon levels in our atmosphere. If these levels rise to higher levels, the cascading of climate conditions into irreversible decline will cause the destruction of land and vegetation beyond recovery, leading to the depletion of the soil, water, plant and animal and human populations.

Please don't let this bill pass out of committee,
Gretchen Stolfo
