RE- Bonds for LIFT Homeownership program

Dear Co-Chair Girod, Co-Chair Nosse, and members of the committee,

I am quite involved in the Central Oregon affordable housing program and addressing you as a Central Oregon resident to ask the Legislature to allocate \$100 million in General Obligation Bonds for the LIFT Homeownership Program in Senate Bill 5702.

Affordable homeownership is extremely essential to the long-term health of our region and for its continued success as a region. In Central Oregon, many of the people who keep our communities running — teachers, health care workers, service workers, and tradespeople, can't afford to live in the area where they work. Over half of today's Bend workforce has to commute from outside the city due to rising housing costs and lack of affordable options. This strains families, increases traffic and environmental impacts, and weakens the stability of our community.

LIFT Homeownership is one of Oregon's most effective tools for creating permanently affordable homes for first-time buyers. These are not one-time investments. Many LIFT-supported homes are placed in community land trusts or structured to remain affordable long term, serving multiple income-qualified buyers over time. A single public investment supports generation after generation of homeowners, creating lasting community assets rather than temporary relief.

Local affordable homeownership developers have shovel-ready projects in our region today. Every 1 million invested through LIFT supports the construction of approximately five new homes, leveraging additional local and private funding. A 100 million investment would help create roughly 500 homes statewide — homes that remain affordable and continue delivering public benefit for decades.

This level of investment reflects the scale of Oregon's housing production gap. We are significantly behind in meeting demand, and catching up requires bold, targeted action. LIFT represents a long-term capital investment in stable communities, workforce retention, and generational opportunity.

My wife and I urge you to include 100 million for LIFT Homeownership in SB 5702 and ensure that Central Oregon communities of all ages are not left behind in the statewide response to our national housing shortage.

Sincerely,  
Jose Graterol  
Bend Oregon
