While I do not live in Hillsboro, as a citizen and supporter of Oregon's UGB as well as the small farming movement, it seems totally irresponsible to turn some of the best soils in Oregon for farming (the same land that is earmarked in this proposal) over to development particular when the issue of water scarcity (which will only increase in the years ahead) makes diverting water to the building and maintenance of industry or housing extremely ill conceived. I truly hope you take the position of those in attendance opposing this proposal to heart.
