

Submitter: Kathleen Buchanan

On Behalf Of:

Committee: Senate Committee On Commerce and General
Government

Measure, Appointment or
Topic: SB1577

Dear Committee members,

I am submitting testimony in support of SB 1577. My reason for supporting this bill is the fact that manmade food is a science project, not food. Our country is the most unhealthy country in the world, because the food industry has been allowed to pass off their over processed science projects as a healthy alternative. Not allowing the food industry to use common description names of real healthy food such as meat. Is a good step towards making them accountable for their deception, and their marketing of a product that is not a healthy food. Most consumers don't pay attention to what they are eating and feeding their families. It's no wonder why the American people are so unhealthy. I just read an article recently that 89% of the food in our grocery stores is over processed foods. Sad to hear those statistics.

Respectfully yours, Kathleen K Buchanan
