

Submitter: Deena Fidler  
On Behalf Of:  
Committee: Senate Committee On Commerce and General Government  
Measure, Appointment or SB1577  
Topic:

I am writing in support of Senate Bill 1577.

As a person that works in the medical field, I see patients with chronic disease that could likely have been prevented and or symptoms decreased by better food consumption. I find that they are sadly misinformed about the products they are putting in their body. This is essentially criminal.

We must have transparency in our food labeling.
