Measure, Appointment or Topic: SB1571

Why do we regulate THC so closely, but not nicotine? I struggled with nicotine use in high school, and today I am appalled at the predatory marketing of tobacco companies. I saw this again from biohacking influencers, who peddle and shill for prestige nicotine products along with caffeine, shrooms, and ayahuasca. If we're going to regulate psychoactive substances, we should do it with consistency, and regulate all nicotine delivery products the same.
