

Submitter: Andrew White
On Behalf Of: Blue Mt Translator district
Committee: Joint Committee On Ways and Means Subcommittee On Capital Construction
Measure, Appointment or SB5701
Topic:

I am writing this letter of support for the capitol funding request. We have a out of date power source that poses a threat to public safety and to the forest safety. There are numerous users on the line and they rely on our power for transmission of EMS and eas broadcast. ODOT and OSP rely on our power that we provide. We have radio and television that act as community alerts as well that broadcast from this site. There are portions of this project that we have funds for and are shovel ready in 2026.. Please help our community stay informed and give our first responders a reliable power source in the future by funding the BMTD ask put forth by Rep Levy! Thank you much, Andrew White Director Blue Mt Translator Distirct
