Measure, Appointment or SB5701  
Topic:

Chair and Members of the Committee,

The Creative Services team at the Oregon Museum of Science and Industry (OMSI) has been designing exhibitions for the new McKenzie River Discovery Center for over two years. In that time, we've developed content and designed environmental and interactive experiences sharing the unique story of the McKenzie River and the critical importance of its stewardship.

The McKenzie River Discovery Center team and board bring an incredible passion and vision to what the future center will bring to Oregonians and tourists to Lane County. The exhibits for the Discovery Center focus on the unique geology and hydrology of the area, the flora and fauna that call it home, and the history and culture of the McKenzie River Drift Boat.

As a part of our development work with McKenzie River Discovery Center, we've been fortunate to connect with their community and other scientific experts on their subject across the state of Oregon. The OMSI Creative Services team has been honored to be part of this project and will be thrilled to help it come alive for future audiences.

Sincerely,

Ciera Iveson  
Creative Director  
Oregon Museum of Science and Industry
