

Submitter: James Cochrane
On Behalf Of: Disston Fire Station
Committee: Joint Committee On Ways and Means Subcommittee On
Capital Construction
Measure, Appointment or Topic: SB5701

I support the building of a Disston Fire Station. This fire station means a lot to our valley. We voted to tax ourselves, outfitted Row River Rural Fire Department, a deserve a building of our own. We had fire engines that were generously donated and bought with grants. More grants were written to get personal protection equipment for our volunteer fire fighters. Now the RRRFD needs a place of their own to store the equipment. It is currently stored at a farmers barn and the farmer wants his barn to use too. This will be the first of three planned fire station for our long valley being placed in a very strategic spot - right up against the national forest. Weyerhaeuser generously donated the land because they support the goal of a station in the Disston area. Please support the funds for our community to have our first fire station.
