

Submitter: Diana Willison

On Behalf Of:

Committee: Senate Committee On Finance and Revenue

Measure, Appointment or Topic: SB1586

Good morning,

The Willamette Valley has some of the best farm land in the world. Something that we should all be incredibly grateful for. Our government is putting profit over people and looking to pave over 1700 acres for a data center that will contribute to climate change, pollute our environment, and permanently strip away our fertile farm land. There is already 500 acres in the middle of town that you jackasses already have access to. Not to mention abandoned warehouses. I am EXTREMELY disappointed that instead of listening to the people who live and work here who have consistently opposed this measure, that our government is trying to sneak around it. We do not want more data centers. That is not our future. I am opposed to this measure. Vote no.
