

Submitter: Ann Richer

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: HB4102

The bill currently lacks clear third-party selection criteria and oversight mechanisms.

It risks privatizing public permitting functions without accountability.

It does not sufficiently protect Oregon's skilled workforce.

It opens the door to regulatory shortcuts, conflicts of interest, and inequitable outcomes.

Clarity, accountability, and equity are extremely important to me, so I am opposed.
