On Behalf Of: Row river Community Partnership
Committee: Joint Committee On Ways and Means Subcommittee On Capital Construction
Measure, Appointment or SB5702
Topic:

Our recently formed fire district operates on a small tax base. Our current Lane County tax income supports regular maintenance and supplies for trucks and personnel. We currently have the trucks and other supplies stored at the chiefs residence in a barn. To services the upper section of our volunteer district, our first building need is a station in Disston, to house a fire truck, tender, and brush rig. All our capital expenses are coming from grants. Within 10 years, our goal is to have a main station in the middle of the valley along with the smaller Disston station and an additional substation towards the west end of the valley. Please support Row River Rural Fire Protection District to build the Disston station.
