Committee:

Senate Committee On Finance and Revenue

Measure, Appointment or Topic:

SB1586

This is an outrageous attempt to bypass the public's voting rights and steal 1700 acres of the world finest soils! We the people have already voted against this, multiple times. There is plenty of perfectly good land that is already in the approved city boundary expansion zone. We have no reason to poison farmland with factories and their waste. In a time when this country is losing its trade partners and allies, we will need all the farm land we can get to feed the people. No "influx of jobs" will justify that kind of loss! Besides, jobs can't feed people when there's no food in the grocery stores. I'll add that it's mighty suspicious that there's such a big fight for this Private property, when there's suitable space already available. Who or what is at that site that they want? Competition? Gas? Oil? Minerals? Secrets? There's been too much effort put into acquisitioning this property, against the owners' and the public's will, for it to just be about location convenience!
