**STOP THE STEAL!**

We need to save our Farmland. Our future generations are going to never spend any time enjoying the great outdoors if we continue to take away the Farmland. We will have generations of people who only spend time with themselves, will have no people skills, will find violent crime will increase, mental health issues will also increase etc.

The other issue is WHY would you promote putting Farmland into a Data Center, when the Governor and many others are looking at closing Data Centers because they contaminate the land and the grounds and now you want to take Good Producing Farmland and turn it into a potentially hazardous waste area.
