

Submitter: Lucius Hammock  
On Behalf Of:  
Committee: Senate Committee On Finance and Revenue  
Measure, Appointment or Topic: SB1586

I'm Lucius Hammock, and I oppose SB 1586 because I care about having a future. Hear that one too much? Fine. This sort of thing is just going to make life worse. I mean seriously, we're all aware I'm sure of the issues plaguing us in the modern day, so I'm not going to go over them in too much detail. I suppose I'll keep this succinct. This will harm the agricultural economy, food security, watersheds, natural habitats, the air we breathe, the soil, anybody living anywhere nearby, utility bill prices, land prices of nearby farms, nearby farms in general, and the mental health of anybody seeing another example of things being made worse for no reason. Hurting farmers, hurting nature, and hurting the economy at the same time? The people who benefit from this are not the already-overburdened common folk. They're people with a bunch of money already. This bill is, not most likely is, not maybe is, it just *\*is\**, not popular. This bill is an insult to just about anybody with any kind of opinion at all on anything.
