Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: HB4102

I strongly oppose bill as currently written - without oversights, it gives private firms free reign to harm by self-interests.

The bill currently lacks clear third-party selection criteria and oversight mechanisms.

It risks privatizing public permitting functions without accountability. - Accountability is key when related to pollution protection

It does not sufficiently protect Oregon's skilled workforce. - I want workforce protected, not subject to harm by private firm money driven decisions
