

Submitter: Madeleine Berk

On Behalf Of:

Committee: Senate Committee On Finance and Revenue

Measure, Appointment or Topic: SB1586

The people that own these data centers do represent the people of Hillsboro or Oregon. They are multi-billion dollar conglomerates who don't pay taxes but will raise utilities in the area. They're presence will disrupt the environment; bringing temperatures up by spewing green house gasses, polluting the air, as well as the soil with forever chemicals, and using non renewable resources like our clean water and natural gas. They also are an eyesore. The senator in support, Sollman is not representing her constituents, she is representing the corporate entities that will enrich her and create issues for the following generations- the people who actually live here and love this area. We do NOT need AI. What we do need is clean water and soil, and a government that is willing to protect us rather than businesses.
