

Submitter: Anna Kurnizki

On Behalf Of:

Committee: House Committee On Revenue

Measure, Appointment or Topic: HB4136

Dear Chair Nathanson, Vice-Chairs Reschke and Walters, and Members of the Committee:

My name is Anna Kurnizki and I am the Executive Director of Community Warehouse, a nonprofit furniture bank in the Portland area.

I am writing in strong support of HB 4136 because it makes a meaningful investment in people and long-term stability by expanding access to homeownership for Oregonians seeking to buy their first home and put down roots in their communities. Stable homeownership helps families, strengthens communities, and supports local economies. Down payment assistance is a practical way to help first-time buyers stay and invest in the places where they live and work.

Homeownership remains one of the most effective pathways to financial security, intergenerational opportunity, and community connection. Yet today, many first-time and first-generation homebuyers face unprecedented barriers, including record home prices, high interest rates, limited housing supply, and limited access to support. For these households, the inability to assemble a down payment is often a major obstacle to homeownership.

HB 4136 addresses this challenge by enacting narrowly defined amendments to Oregon's mortgage interest deduction and dedicating the resulting funds to down payment assistance for first-time and first-generation homebuyers. The bill maintains the tax break for primary residences while ending its application to "single-use" or "second house" vacation properties that sit vacant for much of the year.

Down payment assistance is one of the most effective and well-documented tools for expanding access to homeownership. In the last biennium, Oregon Housing and Community Services partnered with nonprofit homeownership providers to distribute more than \$22 million in down payment assistance, helping over 600 first-time and first-generation buyers purchase homes. Every participant completed HUD-certified homebuyer education and counseling, supporting long-term housing resiliency. Many of these households served were families of color and first-generation buyers who have historically faced systemic barriers to homeownership.

Despite these proven outcomes, down payment assistance programs currently lack a stable and dedicated funding source. HB 4136 helps address this gap by directing approximately \$9–10 million per year to support this critical investment in our

neighbors and communities.

This proposal reflects a thoughtful realignment of public resources toward households who will live in these homes year-round, contribute to their local economies, and put down deep roots in Oregon communities of all sizes. It's a practical investment in household stability, economic resilience, and community strength.

I respectfully urge you to support HB 4136 and help expand sustainable pathways to homeownership.

Thank you for your consideration and service,
