Brian Dirks

On Behalf Of:

Committee:

House Committee On Revenue

Measure, Appointment or Topic:

HB4136

I oppose this measure because it stifles human innovation and desire to improve ones lot in life. People buy second homes to improve their retirement portfolio as well as their natural spirit to improve their lives. Buying a second home is a gamble we're willing to take as we could lose the entire value because of the whims of government or natural disasters, squatters or any number of unforeseen events that happen in life.

Please stop stifling our spirit. We add to the economy with our desires. This measure obviously stamps down our desires. We gamble knowing the existing rules. Changing the rules midstream is unfair.
