

SJR201

Greetings-

As you know, Oregonians are hurting. Taxes are so high that it affects everyday living. Rent is high, gas is high- many states prices are around \$2.00 a gallon. Food prices are high. Many businesses and families are leaving the state for these reasons.

Y'all need to go out to a few sections of your districts and ask folks just how happy they are with our governor, Senate & legislators. I'm sure you don't want to do this because you'd hear many things you don't want to deal with.

Taking our kicker, especially since it's what we've paid into the pool, is wrong! People that do the right things, go to work, pay your bills, pay your taxes, deserve the kicker!

For y'all to think it's owed to the state because of your bad money management.

People look forward to the kicker, perhaps to get caught up on bills, maybe get their kids some new clothes or shoes because they can't afford it otherwise.

Maybe they'll get groceries because they have gone without for a while.

You've already taken so much from the people that do the right thing. You give illegals \$200.000 of our hard earned money because they've had a stressful time worrying about Ice. Give me a break, let's worry about legal Oregonians and give them what they've earned! Back away from our kicker!
