Although the bill is couched in a few good ideas such as matching recent federal tax law changes and aligning sunset dates for provisions related to earned income tax credits, it should never be allowed to pass because it would just "automatically repeal" an existing requirement in our state Constitution, WITHOUT the vote of Oregonians. I am sick and tired of a few self indulgent people deciding that they can just make changes to the way we want our state ran WITHOUT the approval of the majority of Oregonians. This just reminds us of SB1599 where they think they will just pass an illegal bill and forget what the Constitution says!

Also to make it more appealing for the few on the left to get their message out and get a tax credit for doing it at same time, they added in a TAX CREDIT FOR CONTRIBUTIONS TO FILM PRODUCTIONS THAT MAKE COMMERCIALS! These commercials would resemble the ad ran in the Oregonian recently touting 1.5% to aid wildlife, but NEGLECTING to mention that it raises taxes on hotel stays by 83%! A small matter to them, but a LIE to the rest of the moral majority in Oregon! They are afraid to tell the whole truth because what they are trying to do stinks!
