Committee: Joint Committee On Ways and Means Subcommittee On
Capital Construction

Measure, Appointment or Topic: SB1601

Dear Joint Committee,

I am strongly opposed to cuts against safe routes to school, Connect Oregon, and Community Paths laid out in amendment -3. These services ensure our children's safety, provides Amtrak service, and builds bike and pedestrian friendly infrastructure. Everyone of these cuts will gut Oregon of one of its outstanding achievements. People love this city because it feels good to walk around in. We should be improving on these wins more, which means more funding, not less. It's a shame that you would even imagine gutting these lifesaving programs. This measure if passed will lead to real human death. Keep that in mind every time you pass bills on transportation infrastructure.

Do right by our state and its people, keep funding these excellent services that are necessary for our city's development
