

Submitter: Adam Harris

On Behalf Of:

Committee: Joint Committee On Ways and Means Subcommittee On
Capital Construction

Measure, Appointment or Topic: SB1601

I am in strong opposition to this bill because of Amendment -3.

We can't afford to have so much funding taken from such important safety and transportation resources.

The cuts this would make to safe pedestrian paths, especially near schools, for the safety of children, and bike paths that help reduce car congestion on roads.

Reducing funding from Amtrak Cascades, a critical transport system for people at all points between Eugene and Portland, would greatly hinder the travel ability of most Oregonians.

For these and the myriad reasons reducing funding as Amendment -3 does would rob Oregonians of safety and ability to travel.

Please vote NO on it.

Thank you
