

Submitter: Kyle Chesney

On Behalf Of:

Committee: Joint Committee On Ways and Means Subcommittee On
Capital Construction

Measure, Appointment or Topic: SB1601

This proposal is absurd. Gutting public services is a dangerous downward spiral. Trimet has already been gutted. Making biking and train travel worse is absurd especially under this new energy crisis as oil prices are about to spike due to the chaos the president is causing in the middle east. This bill is clearly put forward by people who dream of making the world worse (forcing everyone to rely on cars to school and other cities)

The government is supposed to do good for its citizens. Not take away the few good things it still does for us
