Capital Construction

Measure, Appointment or Topic: SB1601

Please do not rob the bicycle tax revenue to pay for car centric transportation. That's literally what you're doing.

Not everyone rides bicycles for fun!... I lost my vision to be able to drive early in life. I had to learn to ride a bike at 48 years old because the surgeries are too dangerous. I considered how Transit takes a long time and it hurts me to walk due to degenerative condition.

So my E-bike allows me to keep my independence. I don't have to rely on the government for help with a ride. But I need safe infrastructure to get to my appointments.

Please stop thinking that cars and vehicles are the main way we have to commute. I have slowly learned how to get around, got gear to keep me protected.

There is a way to do it without fuel and polluting the environment, and actually enjoying oneself on the way to appointments!
